Lancaster Farming

Vol 7 NO 47 Lancaster Farming, Saturday, March 24, 1962 $2 Per Year

EXHIBITING HIS CHAMPIONSHIP wildlife display at the first 4-H Wildlife club roundup is Jay Foreman, Lititz R1, left, president of the club Complimenting Jay on the work he has done during the year is Jack Rockelman, assistant York County Agent, judge of the competition Among the other wildlife conservation projects in the display was the wood duck nesting box made from a discarded nail keg. Foreman showed how inexpensive material found around any farm can be used to construct wild life conservation projects. There were seven other exhibits on display. L. F. Photo

4-H Wildlife Club President Wins Exhibit Roundup Prize

The president of Lancaster County's only 4-H Wildlife club showed members of the club he deserves his post Wednesday night when he exhibited the championship display af wildlife conservation materials

Winning out over the seven other exhibits, Foreman drew the compliments of judge, Jack Rockelman, Assistant York County Agent, for his use of inexpensive and easily-obtained materials for the construction of his exhibit.

Foreman, a 19 year old graduate of Manheim Township High School, has been a 4-H club member in community clubs for 10 years His projects have included tobacco, beekeeping, entomology, electric and gardening

At present he and his father, Vernon Foreman, farm 67 acres at Lititz R1, where they keep a dairy herd of 30 cows

Tied for second in the competition were the exhibits of Carl Siegrist, Lititz R3 and J Marvin Shenk, Lititz R4 Annette Long, Lititz R3 placed fourth

Prizes awarded to the four winners were donated by the Animal Trap Company of America at Lititz

Adult leaders of the club are Mr and Mrs Melvin Long, Lititz R3, and Robert Long Lititz

Foreman was in charge of the first annual roundup of the club

Farm Calendar

March — 7 30 p m - Lancaster County Future Farmers meet in the Elizabethtown High School

March 27 — 7 30 p m. - County 4-H tractor maintenance clubs roundup at the Farm Bureau building, Dillerville Road, Lancaster. 4-H Handyman club roundup at same time and place.

7 45 p m - Dairy Herd Improvement Association Workshop for all associations in the southern part of the county, at the new Solanco High School

9 30 a m - Tobacco seed cleaning and treating demonstration at the farm of Harvey Metzler, Lancaster R4 Sponsored by the county

Planting Intentions For Spring Show Farmers Will Seed More

Pennsylvania farmers intend to plant more acreage to corn, barley and soybeans, to keep tobacco and oats acreages unchanged, and to make a reduction in potatoes and hay

The Pennsylvania Crop Reporting Service said today that intended acreages for the nine principal crops of the State total 4,699,000 acres for the 1962 crop year This compares with 4,749,000 acres planted for harvest last year Compared with the 10-year average all crops except tobacco show an acreage decline with the collective total down 11 per cent

Total feed grain acreage will be 2 per cent more than last year Corn is expected to be up 3 per cent to 1,201 000 acres, but still 6 per cent below the 10-year average Last year's small acreage was partially due to poor weather conditions during planting season Oats acreage is intended to be unchanged at 613,000 acres Barley, most of which is planted in the fall, increased 3 per cent to 190 000 acres

Acreage planted to food grains — wheat and rye — is down 13 per cent from a year earlier Winter wheat, at 465 000 acres, also was off 13 per cent and rye, at 26,000 acres was down 10 per cent Dry weather at planting time accounts for some of the decines Snow cover was poor through the coldest part of the winter and there is some evidence of heaving and winter kill The full extent of the damage is yet to be determined

Pennsylvania potato growers will continue their down-

Direct Seeding Tomatoes Promising, Specialist Says

Direct seeding of tomatoes is the coming revolution in the vegetable growing business James Dutt Extension vegetable specialist from the Pennsylvania State University told Lancaster County Farmers and custom spray operators Wednesday

Speaking at a pest control and spray meeting in the Lancaster Poultry Center Dutt said the big problem heretofore in the direct seeding method (planting tomato seed directly in the field with a corn planter or similar machine) has been an effective weed control program

With two new herbicides Solan and Tillam the weed control problem may be on the way out

Increased yield is not the only factor to be considered in deciding to use chemicals for weed control he said "I'm convinced too many farmers do a poor job of plowing and then try to fit the soil and they overwork it and push out all the air and water-holding capacity

In tests last year he said, direct-seeded tomatoes sprayed with Solan yielded 25 tons per acre

He also mentioned Diphenamid a herbicide which has looked favorable for use on cabbage green and lima

(Continued on Page 12)

Swine Herds Growing Co. Breeders Are Told

About 300 swine breeders in the state have sow herds of 20 or more sows Livestock specialist said Thursday night

Speaking at the annual banquet of the Lancaster County Swine Producers Association Dwight Younkin said the trend is toward larger swine herds

He told the 264 members and guests that hog numbers in the state are down as smaller breeders close out their herds He predicted a "fair" year for swine producers

Younkin suggested that breeders consider using half brothers of herd sires that have produced desirable offspring to breed for more uniformity in the herds

He suggested that managers of barrow shows consider the adoption of carcasses as an aid in evaluating breeding progress in producing meat type

Future Farmers Win Awards

Three Lancaster County Future Farmers were awarded medals in the state Project Record contest Wednesday at Harrisburg

Two members from the Grasslands chapter won top medals in the four-enterprise phase of the farming program contest

Winners of the coveted gold medal were Kenneth Sauder and Carl L Gehman, both of Garden Spot High School, New Holland

Paul Welk of Garden Spot FFA Chapter, received a silver medal, according to the announcement made by James C Fink state FFA adviser

Forty-one medals and five honorable mention awards were granted the largest number of honors for any of the vocational agriculture contests in which members compete

The four-enterprises contest had 75 programs qualifying for statewide judging after school county and area eliminations in the 28 vocational

Agri. Council To Discuss City, County Planning

Land use in Lancaster County will be the subject for discussion at the meeting of the Lancaster County Agricultural Council

C Bickley Foster, Lancaster County Planning Commission, and Burnell Cohen, Lancaster City Redevelopment Authority will discuss the parts their organizations will play in the future of Lancaster County

County Agent, Max M. Smith will lead an informal discussion of the individuals attending the Ag-Industrial Conference recently at York.

Officers for the coming year will be elected at the meeting scheduled to begin at 9 30 a m, Thursday, March 29, in the Lancaster County Farm Bureau Cooperative Association Auditorium, Dillerville Rd. in Lancaster

FIVE-DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures during the next five days are expected to average near the normal range of 35 at night to 55 in the afternoon. No marked day to day changes in temperatures are expected. Precipitation may total 0.1 to 0.6 inch falling mainly near the end of the period, but with a chance of some rain Sunday or Sunday night.

with

ORTHO "UNIPELS"

The nutrients in Ortho Unipel pelleted fertilizer are chemically blended. Every Unipel pellet contains exactly the same amount of nitrogen, phosphate and potash as the formulation announced by the label
Only through the use of chemically-blended plant foods can you be certain that each plant receives its exact quota of specified nutrients.

The unique Ortho manufacturing process gives two forms of nitrogen and phosphate — one form that is immediately available to plant roots for quick starting growth, the other a continuous feeding, long lasting type.

Delmarva-Georgia
Broiler Prices About Steady

Delmarva reported live prices about steady with a fair demand for moderate supplies during the 24 hour period ending 10 30 Friday morning

Prices and purchases at farms during the period included 947,600 head at prices ranging 16 6 to 17 8

Estimated slaughter by Eastern Shore processors for the week end was 764,000 head compared to the 696,000 head last week end

The Delmarva broiler-feed ratio for the week ending March 16 was down two points from the previous week at 3 8 Broilers averaged 17 34 per pound and 20 per cent mash cost the grower $92 70 per ton

The ratio for the comparable week a year ago was 3 9 when broilers averaged 18.04 and mash cost $94.02 Six months ago the ratio had dropped to 2 8 as broilers averaged only 12 96 and mash sold at $92 97

Fluid Milk
Supplies Gain In All Areas

All areas reported slight production increase in fluid milk again this week

Offerings were increased and generally in excess of needs

Bottling demand was light in New York fair to good elsewhere

Surplus over bottling needs increased slightly, but cleared satisfactorily with the northeast reporting heavy movement to separators and manufacturing plants.

Wholesale selling prices in New York for bottling quality milk was $4 82 to 4 90 per 40 quart unit This was 3 to 5 cents lower than the previous week

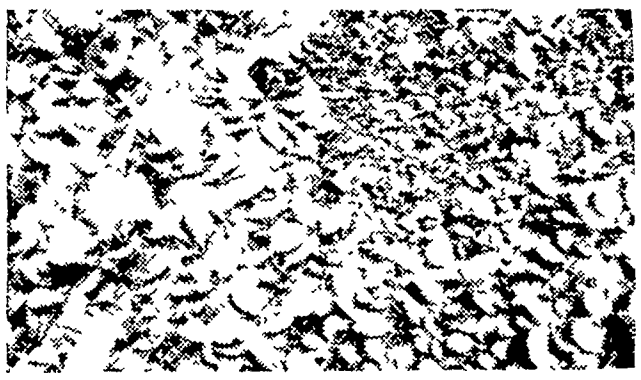
There's one thing that will give you more for your money than it would ten years ago - the penny scale at the corner drugstore



Well-started tobacco plants (left) will stand up better after transplanting.

Easy Way to Grow Sturdy Tobacco Plants

For top quality, sturdy tobacco plants, use the proven combination of plant foods, Agrico for Tobacco Plant Beds and Agrinite Apply 2-3 lbs Agrico for Tobacco Plant Beds per pan before steaming Just before sowing the seed broadcast and rake in 2-3 lbs Agrinite per pan. This gets your plants off to a quick start with a stronger root system and better able to resist disease Your plants will be ready for the planting earlier if you topdress the beds with 3-4 lbs Agrite per steam pan when the plants are about the size of a dime Agrinite, the slow releasing, all organic nitrogen fertilizer - gives a healthy green color, promotes vigorous plants with well developed roots This means your plants will be ready earlier and will stand up better after transplanting.

From Where We Stand . . .
Farmers Must Decide Who Sets Controls

Last week a group of Lancaster County farmers went on record as favoring a system of self-imposed controls on tobacco production.

We believe this is a step in the right direction

We think it is a step that should have been taken years ago.

Recently the Lancaster County tobacco growers turned down the government control program for tobacco quotas and marketing allotments

We would not criticize any farmer for voting his conviction If the Lancaster County farmers were opposed to the program, then they did the right thing in voting it down

But it is well to remember what Secretary of Agriculture, Orville Freeman said at a press conference in the spring of 1961

He told newsmen that farmers had the privilege of voting down any proposed program, but if they did, they had better have a program to propose in place of it. Unless farmers come up with a workable program, they will get a program of some kind, he said.

This, we believe is logical We believe farmers can no more go on producing commodities, giving no thought to the distribution and consumption of those products, than can general motors, or general electric, or any other manufacturing concern produce to the peak of their capacity without concerning themselves with consumption

We believe farmers would do well to consider all phases of farm production with the idea of planning production to meet the market, not only so far as quality is concerned, but taking into consideration potential of the quantity the market can absorb.

Any program that is self imposed has a better chance of keeping the effected persons happy than does a program imposed by some outside person or agency

However, we believe the chances for success of the program are in a precarious position

Such experiments in the past have shown that farmers are reluctant to cooperate fully enough to make any voluntary program of production controls work

We hope we are being too pessimistic, and that the farmers of the county prove us wrong

We think the Lancaster County Farmers Association are to be commended for their foresight and leadership in this venture, and we hope the tobacco farmers of the county back them up

Only with the cooperation of all tobacco growers can the program hope to succeed

At least that's how it looks from where we stand

★ ★ ★ ★

Is Big Best?

We have heard it said time and again, "The big get bigger and the small get swallowed up"

The facts may seem to prove this but the implication is wrong

It is not bigness alone that guarantees the success of a venture, nor is it smallness alone that condemns a venture to oblivion

Rather it is excellence and efficiency of operation that allows a business to prosper, and it is poor management and inefficiency that causes a business to close its doors forever

There is still, and in our opinion always will be, a place for the small business that is run efficiently

And this includes the business of farming

When asked how many cows are needed for a profitable dairy operation a Penn State University dairyman said recently, "It is not the number of cows that is important It is the number of pounds of milk each man can produce from his cows"

The specialist then asked three outstanding county dairymen about the size of their herds. These three men, tops in Dairy Herd Improvement Association records, normally milk 25 to 30 cows, and they do it with little or no outside labor

Wasted skills, wasted space, wasted machinery, wasted time, or wasted production ability on the farm all result in wasted money, and wasted money results in failure of any operation.

At least that's how it looks from where we stand

Law of Love

Lesson for March 25, 1962

IN the sight of God, what is my most important duty? What can I do that will yield the best returns in life? It is a happy discovery to learn that the answer to both questions is the same We know this is true because Jesus himself was asked both questions, and gave the same answer each time The strangeness of his answer is that he did not directly say to either questioner DO—anything whatever The highest duty and the most rewarding effort is not action but attitude For Jesus' reply to these questions was **Love** God; **Love** your fellowman Jesus was not the first to sum up the Law and the Prophets—in short, the entire Old Testament—in these two commands, love to God and to neighbor, but he gave his approval to this way of summing it all up.

Dr. Foreman

Love to God

We have called love an "attitude." This is not quite fair, for love which is only an attitude, never resulting in action, is not what Christ and Christians after him mean by the word. Nevertheless, love is an attitude before it is an act. You might say, love should be the atmosphere, the light, in which you see, or think about, God and your neighbor. Now it is clear that love to God can't be precisely the same as love to men, even the best of men. From all that is said of "love" in the New Testament—for instance in I Corinthians 13, or John 13 through 17, it is plain that love, as God approves it among men, involves helping them when in need But God is never in need. Also, love is at its high point when it is expended on the unloving and the unlovable; but God is never unloving nor unlovable. Perhaps we can put together love to God and love to man this way: **Love** s
once
which w
hare glad
n us But the
lifferent They a
veakness and sin,
oncerns arise from
nd power Much of the
f every man can be sum
n one question How can I
ut of the jam I'm in? Not every
ne is in the same kind of "jam."
The troubles of an intellectual
nind wrestling with some doubts
re not the troubles of a mother
ithout enough food for her chil
ren, and neither of these kinds
f trouble is the same as those of
say) President Kennedy But all
he same, love to our fellow man
nvolves being sympathetic with
ll those in trouble, of every sort,
concern and sympathy which
ill pull us into sharing the load,
elping where and as we can.

In reading the Bible

We must add a little but important postscript When this question came to Jesus, on one occasion he gave the answer himself; in another, he got the answer out of his questioner The point is that he answer came from the Bible; but not (so to speak) from right on top of the Bible How often do you, for example, read the book of Deuteronomy or Leviticus? That chapter 6 in Deuteronomy as quite a bit in it which does ot fit us; but verses 4 and 5 do ntensely concern us In that 19th hapter of Leviticus (perhaps no ne's favorite chapter of the Bible!) there are some very peculiar laws, which passed away hen the nation of Israel ceased o be Today people plant two inds of seed in a field, or wear lothes made of more than one naterial, and never think of it; nodern people are not tempted o tattoo themselves as a sign of nourning There is much here hat no longer has force with Christians But "Love your neighbor as yourself" does have force, t did not pass away when Jerualem fell

Read — And Heed — That Pesticide Label

The United States Department of Agriculture has recently released a Revised Handbook on Pesticide Recommendations.

There are those who would still have us believe the use of pesticides will put us all in an early grave

Pesticides play a vital role in the production of high quality foods in the United States, says Dr Dale Bray, University of Delaware entomologist They contribute to the most efficient agriculture in the world

They help to make Americans the healthiest and best fed people on earth

Pesticides can, and are, doing these things without endangering public health, says Bray The important thing is to use them according to direction on the label There have been no cases of death or even illness traceable to pesticides used according to lable instruction, he says

There is really no problem with the pesticides on the market today Manufacturers are controlled too closely to put a harmful product on the market

It is simply a matter of reading the label and doing EXACTLY as it says

At least that's how it looks from where we stand

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Prevent Chilling Of Udders . . .

All dairymen are reminded of the danger of allowing the milking herd to lie down on the cold ground this time of the year when the weather gets nice during late March or early April the cattle are turned outside for too long a time and they will lie down the ground is too cold and the udder becomes chilled and udder inflamation (or mastitis) may result Turn the herd out daily but do not let them lie down in the cold ground.

To Rake Tobacco Beds Lightly

Growers who are preparing their tobacco beds for seeding should be careful not to rake more than one to two inches deep in order to have a weed-free bed When raked deeper some of the weed seeds may not be killed and they will be brought to the surface of the bed Rake very lightly because it's only the top inch or two that needs to be prepared

To Observe Seed Varieties Of Tobacco

Tobacco growers are reminded that it is not recommended to keep their own seed from last years crop of either of the two new hybrid varieties introduced Both the Pennbel and the Pennleaf varieties are hybrids and therefore the seed from them is not to be planted this year Growers will be disappointed in the plants if they try to keep these seed New seed of these two varieties is available at a number of places and growers are encouraged to grow some of this disease (wildfire and mosiac) resistant tobacco

To Allow Dairy Calves Exercise

Young calves and heifers being grown for herd replacements should have daily outside exercise, if these calves are confined in small

Letters To The Editor

Editor Lancaster Farming
Dear Sir

Having only recently read your editorial of February 10 entitled Let's Begin A Fad For Milk I've an idea Why not bottle milk in individual serving-serving sized bottles followins the lead of soft-drink manufacturers?

Personally I thoroughly dislike milk from any container but glass I agree with you all should drink more milk

Sincerely
(Mrs) Nancy S Myers

pens their feet will grow long and their legs will not be as strong or straight This is especially true with calves over four months of age The barnyard or an exercise lot is a good place for them either at their choice or to be turned out daily Yearling heifers will do best in pens or open sheds with free choice of the outside exercise lot

E'Town FFA Holds Banquet

A farmer, a feed dealer and a former teacher of vocational agriculture were awarded honorary chapter membership at the recent meeting and banquet of the Elizabethtown Future Farmers of America

Richard L Breckbill, a farmer at Elizabethtown R3 was the first to be honored Melvin M Wenger, an Elizabethtown feed merchant was accepted into the chapter for his interest and assistance in the chapter's calf ring program Marlin Henninger the teacher of vocational agriculture who organized the chapter in the school and remained as its advisor until last year was invited to return for the banquet and was given a honorary membership

Kenneth Myer Elizabethtown R3, was named Star Chapter Farmer for all-around excellence in chapter activities The Chapter Star Greenhand award for the outstanding first-year student went to the twin brother combination of Dennis and Donald Patches, Elizabethtown R1.

Winning other National FFA Foundation awards for outstanding work in the chapter were Willis Heckman, Elizabethtown R3 field crop production, David Keener Elizabethtown R1, poultry production, Garry Meyerhoffer, Elizabethtown R1, livestock production, and Jay Gish Rheems, farm mechanics

After remarks by T M Mahn, area advisor of FFA for York and Lancaster Counties and presentation of the chapter activities by Richard Shavely Elizabethtown R3, Henry Hackman Lititz R2 gave an illustrated talk of his trip to Poland

Twenty two of the 26 members of the chapter, along with their fathers, attended the second annual banquet The meeting concluded with an Open House of the schools agriculture department

Elvin Hess is teacher of vocational agriculture and advisor of the FFA Chapter

Eggs can be substituted for meat and other protein foods in your diet Two eggs will equal the amount of protein in one serving of cooked meat Because of monotony you won't want to eat only eggs as the two servings of protein foods you need each day An egg yields 77 calories and is a complete protein food

Wheat Acreage Remeasurement Costs Explained

To clear up any possible misunderstanding about the charge wheat farmers will be asked to pay — or at least deposit — this year for remeasurement of their wheat acreage, Fred G Seldomridge Chairman of the Lancaster County Agricultural Stabilization and Conservation Committee, has issued the following statement

The initial measurement of wheat acreage — to determine whether the grower is in compliance with his farm's wheat acreage allotment — will still be done at Agricultural Stabilization and Conservation Service expense, as in former years

The change in this year's program procedure is that farmers with excess acres will be asked to pay the cost of determining 'adjusted" acreage In previous years, similar charges have been made in connection with adjustment of acreages under other commodity programs

If a farmer is notified after the initial measurement that his acreage of wheat seeded for harvest as grain is in excess of his farm's wheat allotment (or his marketing quota exemption acreage, or his "intended" acreage, whichever is applicable), he has the option of either (1) accepting the acreage figure as correct and proceeding to adjust his acreage, or (2) requesting a remeasurement if he believes that the initial measurement is in error

When the acreage is remeasured, the farmer will be asked to make a deposit of $4 00 to cover the cost of the service In some cases, this deposit will be refunded to the farmer

The deposit will be refunded because of an error in the determination (1) if the remeasurement brings the acreage within his wheat acreage allotment, or (2) if the acreage remains in excess, but it has changed as much as the larger of 3 per cent or 3 of an acre

The Chairman reminds the wheat growers that the deadline for signing up spring wheat acreage for participation in the 1962 wheat stabilization program extends only through March 30 'Signing up', he emphasizes "is the first step necessary in order to qualify for the various benefits available under the '62 wheat program '

Everyone loves power — even if they do not know what to do with it — Benj Disreli

Wildlife Week Is Observed

Conservationists across Pennsylvania will observe National Wildlife Week from March 18-24 The week has been set aside to pay special tribute to wildlife and its importance to our everyday living

State Conservationist Ivan McKeever, of the United States Soil Conservation Service, said Wildlife Week provides an opportunity to emphasize the importance of sound land use and wildlife

McKeever said, "Good game management begins and ends with the soil The prerequisite of a sound management program is good land use and habitat improvement — both food and cover

Nearly one million hunters roam the hillsides annually in the State Over 80 per cent of the small game which they harvest is taken from farm lands It is on these same lands that they pin their hopes for future wildlife development

With these facts in mind, the Soil Conservation Service articles has focused
the basic fundam
land use and gam
ment"

McKeever also added this year Soil Conserva Districts are celebrating their 25th anniversary It has been through cooperative assistance with Soil Conservation Districts that the Soil Conservation Service has helped develop wildlife habitat on the farm lands of the State

Today, over 27,000 farmers, cooperating with Soil Conservation Districts in Pennsylvania, are installing Soil Conservation practices on nearly four million acres of land Most of these practices are improving the wildlife resources of our fine State

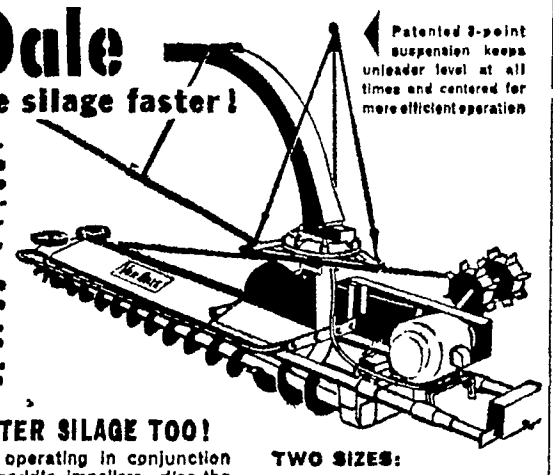
Get the BIG silo unloader value!

VanDale

Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute Your cows and cattle get good, palatable silage . . . not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 10' to 16'
Heavy Duty—for silos 12' to 20'

Speaking of Pullets

MANAGEMENT
IS
IMPORTANT

In large measure, flock performance depends upon the development of a bird's MAXIMUM EGG LAYING CAPACITY. Proper management of GROWING PULLETS is one of the most important principles contributing to success. Other equally important factors include: good breeding, good feeding and adequate sanitation.

For a sound, successful RECORD PRODUCING* program which will raise your pullets at a surprisingly reasonable cost.

See your Early Bird Service Representative or call us direct at

LANCASTER, EXPRESS 2-2145

FINEST SERVICE ANYWHERE!

cent more than average.

...wers intend to ...acres, the same as ...o, but about 6 per

Growers intentions as of March 1 indicate that acreage for harvest in 1962 will be 31,000 acres, the same as last year This crop which is known as Pennsylvania Seedleaf, Type 41, is classified as Cigar Filler, and is used exclusively for cigar manufacturing

Acreage harvested at this level will be 6 percent above the 1951-60 average but is well below the record Historic records beginning immediately after the Civil War show acreage in the 3-1000 acre range in that period with a steadily increasing trend until at the turn of the century harvested acreage stood at 27,000 The record for harvested acres was set in 1918 with a total of 49,000 Thereafter a low of 18,000 acres was recorded in 1934 In the past 20 years acreage was at a low of 23,700 in 1952 and a high of 37,300 acres in 1950.

If the 1962 crop intentions materialize and yields based on the 1957-61 average are attained, a crop of 51 3 million pounds will be produced. This would be 4 percent below the 1961 crop but 8 percent above the 1951-60 average

Growers intentions for the 1962 crop are subject to change depending on the factors of weather at planting time and changes in growers plans between March 1 and actual planting time

An increase of 10 per cent in soybean acreage is expected a partial rebound from last years low Based on recent years' utilization, much of this will go into hay and silage

Intended acreage to be harvested for all hay at 2,078 000 is off 1 per cent from 1961 and 7 per cent under the 10-year average Changing forage crop practices may account for much of this reduction.

Soil moisture in most areas of the Commonweolth is well below average due to precipitation less than normal during February and excessive runoff because of deep frost penetration.

Acreage actually planted in the Keystone State may be larger or smaller than reported intentions by reasons of weather conditions, price changes, labor supply, financial conditions, the agricultural program, or the effect of this report itself upon farmers' actions

Grain Program Deadline Nears

Growers who are still "thinking it over" about participating in the 1962 feed grain program were urged today not to delay any longer. The signup period extends only through March 30

Fred G Seldomridge Chairman of the Lancaster County Agricultural Stabilization and Conservation Committee reports that farmer interest is high in Lancaster County the State as well as throughout the country generally Indications are that 1962 participation will run well ahead of that under last year's feed grain program

Farmers who take part in the feed grain program must file an intention-to-participate form in the Agricultural Stabilization and Conservation Service Office indicating the number of corn and grain sorghum acres they intend to divert from production into a soil-conserving use The minimum diversion is 20 percent of the farm's base acreage but many farmers are indicating their intention to divert more than the minimum

Farm Women 15 Hold Covered Dish Luncheon

A covered dish luncheon was a feature of the all day meeting of Farm Women Society 15 this week in the home of Mrs Kathryn Shoemaker, Christiana The members met to sew cancer pads for the Lancaster unit of the American Cancer Society

At a recent meeting in the home of Mrs Erma Witmer Quarryville, Miss Jean Cutler, the Solanco High School student sponsored by the society in the Miss Solanco Pageant entertained with a monologue

A donation of $25 was made toward medical treatment of a local child Members decided to make the scholarship fund its project for the year

Plans were discussed for a bake sale on May 18 at 2 p m in front of Wiley Howett's Quarryville On April 10 members will sew at the Lancaster General Hospital

The ways and means committee announced that fund-raising projects include the a 'bag sale" to be held at sale of vanilla and pepper and family night in August A fun and fellowship night is planned for June 28 at the Colerain Baptist Church Grove

Mrs Lillian Adams presided Mrs Lillian McCrabb led devotions Roll Call was answered by 'A Blunder I Made As A Bride" Refreshments in the theme of St Patrick's Day were served by Mrs Witmer, Mrs Mary Boyce, Mrs McCrabb and Mrs Gertrude Weicksel

The next meeting will be held Thursday, April 19, at 2 p m at the home of Miss Sara Holmes, Andrews Bridge

Farm Women 23 Plan Banquet

Invitations are out for the 10th anniversary banquet of Society of Farm Women 23 to be held on Saturday, April 21, at 6 30 p m at Kauffman's Tea Room, East Petersburg

Henry Hackman, who will present an illustrated lecture on his trip to Poland, will have the feature spot on the program His Polish host will be a guest

Mrs Howard Shaub is program chairman, and Mrs Charles Frey is social chairman for the banquet

Plans were made Thursday at a meeting at the home of Mrs Jay Charles, Washington Boro R1 Members voted to donate $5 to the 4-H International Farm Youth Exchange fund and made plans to send $120 for the support of a Korean orphan for one year A donation of food was made to the Millersville Mennonite Children's Home

The society will be entertained by society 20 at Christiana in June

Farm Women 12 Spelling Bee Is Backwards

A 'Backwards Spelling Bee' was held by the Society of Farm Women 12 in the home of Mrs Lester Sigmon, Lancaster R6, recently Mrs Irene Benedict was co-hostess

In the spelling bee, contestants were required to spell the assigned words backwards Eugene Frey, principal of the Connestoga Township Elementary School was in charge of the contest First place was won by Mrs Clarence Witmer with Mrs Raymond Aston, second and Mrs Willis Glick, third

The group voted a contribution to Meals For Millions The Lancaster County Society for Crippled Children and Adults and the 4-H International Farm Youth Exchange

Farm Women 9 Sew Cancer Pads

Cancer dressings were made at the recent meeting of the Society of Farm Women No 9

The meeting was held in the home of Mrs Alfred McClenaghan, Holtwood R2 with Mrs Clyde Dunkle as co-hostess

The group voted to make a donation of $10 to the 4-H International Farm Youth Exchange, and $5 each to the Cancer Society and the Lancaster County Society for Crippled Children and Adults

Homer

This "new fashioned" fruit cobbler combines the delightful taste surprise of plump raisins with the sweet tang of apples. The dough is quickly made with biscuit mix, then sprinkled with a crumbly topping that becomes crunchy and brown as it bakes It's an easy, delicious dessert that's homemade good

Crunchy Raisin Apple Cobbler

½ cup dark or golden raisins
4 cups thinly sliced cooking apples
¾ cup water
⅔ cup sugar
1 tablespoon flour
½ teaspoon cinnamon
Dash of salt
Biscuit Dough
Crumbly Topping

Combine raisins, apples and water; heat to boiling Blend together sugar, flour, cinnamon and salt Stir into boiling fruit and boil one minute Turn into 8½-inch round baking dish Cover with dough and sprinkle with topping Bake in hot oven (400 degrees F) 30 minutes, or until crust is browned and apples are tender. Makes 6 to 8 servings

Biscuit Dough Combine 1 cup biscuit mix and 1 tablespoon sugar. Stir in ¼ cup milk and 2 tablespoons melted butter or margarine. Pat to circle on floured board, and roll to fit top of dish

Crumbly Topping Mix 2 tablespoons biscuit mix, 1 tablespoon granulated sugar and 1 tablespoon soft butter or margarine together until crumbly.

EASE YOUR INCOME with

Mr. Poultryman, are you getting ready for profitable commercial operation in the years ahead?

As you know, some farmers are expanding flocks for more income, streamlining equipment and housing for peak of performance.
If you are thinking along these lines, ask us about the Purina high density plan It's a plan worked out by Purina engineers, Purina Research Farm specialists, and by field experience It answers questions you will want to know about bird density, housing, insulation, controlled environment, egg handling
Drop by our store today, and prove to yourself . Purina service helps you increase your income.

Science is working hard in Purina's modern laboratories

Science is working hard for you at Purina's modern, new laboratories, Checkerboard Square, St. Louis. Each month, some 25,000 quality-control tests are run on hundreds of ingredients and chemicals used in today's complex feed formulas. Exacting and time-consuming, yes . . . but such work by Purina's dedicated team of scientists is one of the underlying reasons why Purina has led the way in better feeding methods for 68 years.

Purina doesn't believe in experimenting with you, the customer. That's why its laboratory facilities were recently doubled in size . . . to better assure you of top-quality ingredients and precision-formulated Chows worthy of the Checkerboard trademark. This modern laboratory is evidence, too, of Purina's desire to keep abreast of the very latest in animal nutrition . to help you produce more meat, milk, eggs and wool more efficiently.

GET RID OF LICE ON YOUR HOGS

You can go after lice and fleas, help prevent the spread of sarcoptic mange anytime with Purina Hog and Cattle Dusting Powder. There's no need to worry about spraying your hogs in cold weather Just rub Hog and Cattle Dusting Powder into the hair coat of each hog and scatter it in the bedding.

We've got Hog and Cattle Dusting Powder in sturdy, 20-lb. fiber pails at our Checkerboard Store. Pick one up now. And be sure to ask us for your free G-4 Insecticide Duster that comes with each pail you buy!

To stop lice and fleas, dust your hogs with Purina Hog and Cattle Dusting Powder. It's finely ground — gets down next to the skin where it does the most good.

Tractor Clubs Plan Roundup Schedule Tour

The Lancaster County 4-H tractor roundup will be held on Tuesday, March 27, 7 30 p m at the Lancaster County Farm Bureau Auditorium

All 4-H tractor members should plan to be present Parents and friends are also welcome Assistant County Agent Winthrop Merriam said this week

The evening program will include a demonstration contest with both clubs represented A special award will be presented to the winner Awards are being made available by the Lancaster County Implement Dealers and will be presented to the outstanding members in first second and third year work

Burton Horne Agricultural Engineer from Pennsylvania State University who is in charge of the 4-H tractor program in Penna will be present and take part in the program

The 4-H tractor club tour this year will be held at the New Holland Machine Company on Thursday evening March 29 The tour will assemble at 7 30 p m

The tour will assemble in the building located directly across East Franklin Street from the main office

Parents and other interested folks are welcome to take part in this tour Children under 12 should not plan to attend unless with parents, Merriam said

Daily Water Use

Nine out of every 10 gallons of water used in the United States enter into the production of food, fiber, and manufactured products Americans are using about 300 billion gallons of water a day and in 1980 will require 600 billion gallons, Penn State extension specialists point out

Farm Equipment Dealers Elect

Paul Cope acting president of the Lancaster County Farm Equipment Dealers Association since the resignation of Paul Mount last fall, was elected to the post for a full term on Tuesday night at New Holland

John Rineer of Landis Brothers Inc Lancaster was named vice president to succeed Cope, of Cope and Weaver Willow Street Herman Blackhill of Arthur S Young Inc Kinzer was elected secretary-treasurer to succeed Robert Heisey Roy Brubaker of L H Brubaker Lititz remained as assistant secretary-treasurer

The five members on the board of directors are Clydeth Buch, Farmersville Equipment Company Farmersville, Rankin Wiley Quarryville and Wakefield Leroy Wenger of Quarryville R1, Everett Young of Arthur Young Inc and Neil Hochstetler New Holland

In other business the dealers voted to retain their membership in the Conestoga Valley Association and to continue to furnish prizes for the 4-H Tractor Maintenance Clubs

New Extension Post Created

University Park, Pa — Dr Milford R Heddleson, formerly with Ohio State University, Columbus, O , has been named to the Pennsylvania State University faculty as extension agronomist.

Dr Heddleson's work at Penn State will deal with a new extension program in soil survey interpretation for land use Dr Russell E Larson extension director, announced

For his bachelor of science degree he majored in conservation, and in graduate work he specialized in soil chemistry for both the master of science and doctor of philosophy degrees

Since completing graduate work in 1957 he had charge of soil survey laboratory work at Ohio State until coming to Penn State on Mar 1

A fisherman is a fellow who tells the truth a few sizes too big

Why Crops Need Limestone

Two important ingredients needed by crops are calcium and magnesium Both of these are regularly lost through the soil by the following ways

1 By leaching (a slow leaking away — a normal process where there is rainfall)
2 By crop removals (legumes such as hay and other greens are taken off the fields instead of plowed under)
3 By general use of the soil

Because of this loss the soil becomes what is known as high in acid Putting on limestone may supply calcium and magnesium and correct the soil acidity at the same time

It has been shown by experiments by agricultural colleges and experiment stations that for every dollar spent for limestone from $3 to $15 are returned to the farmer through increased yields

Pennsylvania Farm Show
CHAMPION!
Sunnybrook
Started Capons

One of our Vantress-Arbor Acres White Rock surgical capons took the grand championship at the 1962 Pennsylvania Farm Show — and no wonder! These beautiful white-feathered birds have the capacity to add weight fast Body conformation is outstanding and they do the job with surprising feed efficiency

Our started capons are four to six weeks old when delivered — well past the danger age Easy to raise easy to feed As a major crop or to supplement your income you'll find it hard to match premium Sunnybrook capons that bring premium prices in the market

- Write for our free folder on profits from capons.

An Announcement to Horse Owners Everywhere!

We have a new revolutionary product for your horses at our store. We are talking about Purina's new All-In-One Horse Chow Checkers.

Purina Research has done it again—no extra hay feeding is necessary because the hay is built right into All-In-One Horse Chow Checkers. This product eliminates the muss, fuss and strain of extra hay feeding.

If hay is no problem, then ask for Purina Omolene, long-time favorite of horsemen the country over But if you want to eliminate the hay feeding chore you want Purina All-In-One Horse Chow Checkers . . . available now at our store with the Checkerboard sign.

● Direct Seeding

(Continued from Page 1)

beans and onions and said he believes vegetable growers are missing a bet if they do not use some of these newer chemicals

George Berggren extension agronomist also mentioned Diphenamid He said it has not yet been approved for use but that it looks good on soybeans strawberries and new legume seedings but the University specialists want to see more work with the chemical before hey make any recommendations

Berggren said Atrizine is still one of the best chemicals for use in corn weed control but it does create a problem of seeding a cover crop or a winter grain following the corn crop

Lorox an experimental chemical may push atrizine for the top spot in a few years because it does not last as long in the ground and it has given good control on weeds up to six to eight inches tall

'Lorox is pretty hot he said It should be used preemerge or directed away from the corn plants if it is used post-emergence There will be very little lorox on the market this year he said

Atrizine is still one of the best chemicals for controlling most grasses and broadleated weeds he said but if the field has a bad problem with nut grass and quack grass Amitrol-T should be added to the Atrizine and sprayed postemergence when the corn is six to eight inches tall

Berggren also suggested cultivation at least once even with the use of chemicals especially if the soil has a tendancy to crust

Now is the time to spray pastures for wild garlic control he said Waiting till later in the spring will materially reduce the effectiveness of spraying

The ester form of 2,4-D at the rate of 1½ pounds per acre on bluegrass pasture will kill the new growth and most of the bulbs that have started growth It may take two or three yearly sprayings to kill all the bulbs he said Five to 10 gallons of water per acre should be enough to do the job Cows should be kept off the pasture for 10 days after spraying

Herbert Cole extension plant disease specialist said Nematodes are becoming one of the major pests on perrennial ornamental plants He said the Pennsylvania Department of Agriculture's Bureau of Plant Industry is beginning to inspect for nematodes in the soil on the roots of nursery stock Large infestations of nematodes will result in lack of certification by the bureau

Heavy nematode populations on the roots will make the plant appear to be suffering from lack of fertilizer Control of the microscopic-sized worm is usually too expensive for annual plants, he said

Cole also told spray operators they might have to go into potato fields as many as two or three times a week when blight is moving He said the practice of spraying once every week or 10 days will not stop a blight outbreak Spray with Maneb whenever needed he recommended

John Pepper extension entomologist said many cases reported as corn borer last year actually turned out to be stalk rot

Pepper said 1- stalks per hundred was the highest infestation he could find in any field last fall, but the incidence of down corn from stalk rot often ran much higher

There is much evidence to show that the disease builds up in soil with corn-after-corn He recommended rotation of crops if the disease appears to be building up in any particular field

There is no spray control and no one variety looks better than any other when stalk rot is bad he said, but added last year was a particularly bad year for the disease

We can look for the hatch of 17 year locusts about the first of June this year, he said Sevin, sprayed when the first egg cuttings appear on the tree branches will give good control

Mites are becoming one of the more serious insect pests on fruit and vegetable crops Pepper said He recommended spraying fruit crops and vegetables with a mixture of Malathion Kelthane and Tedion seven days before harvest

The meeting was sponsored by the Lancaster County Extension service and was under the direction of Arnold Lueck assistant County Agent

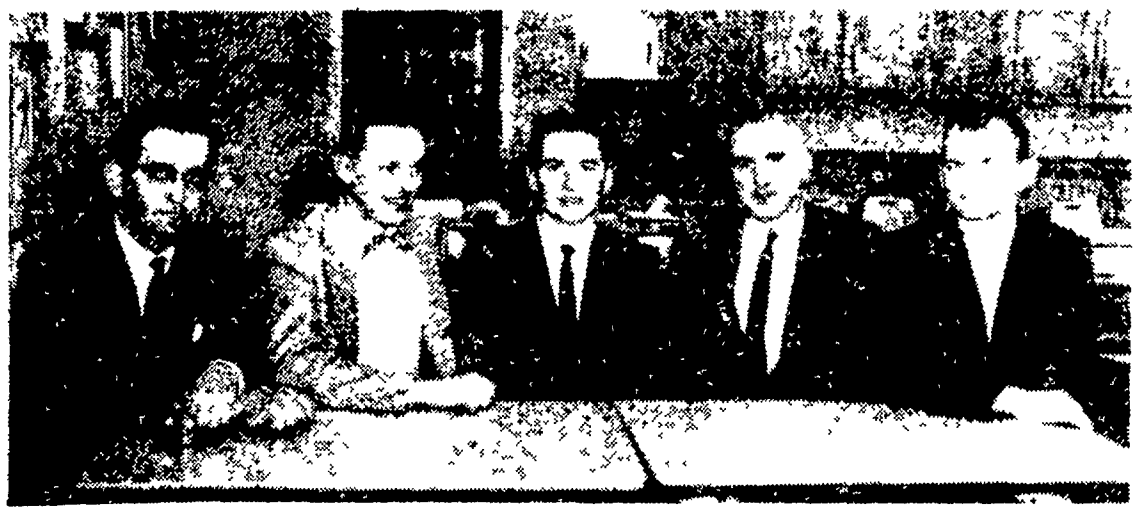
LANC. COUNTY SERVICES FARM... & HOME SUPPLIES FARM BUREAU



THE PANEL OF YOUNG FARMERS who discussed the aims and purposes of their organization Tuesday at the meeting of Region II are L to R, Forney Longenecker, Lititz R3, James Bistline, Landisburg, Perry County, state president and moderator, Gene Daugherty, teacher of vocational agriculture at Garden Spot High School, New Holland; Clyde Jackson, Chester and Delaware area advisor of vocational agriculture and Alfred Overly, Quarryville R1, regional vice president of the Penna. Young Farmers Association L F Photo

Regional Young Farmers Review Aims and Purposes

Pennsylvania Young Farmers in Region II evaluted the purposes and progress of their program Tuesday at a meeting in the New Solanco High School

Discussing "The Purposes of our Young Farmers Association", members and advisors of the organization took a good look at the YFA and the objectives of the group

James Bistline State President of the organization of Landisburg Perry County moderated a panel composed of Forney Longenecker Lititz R3, former state secretary of the Penna YFA Gene Daugherty teacher of vocational agriculture at New Holland High School Kenneth Thompson teacher of vocational agriculture at Oxford Area High School Chester County and Clyde Jackson area advisor of vocational agriculture and YFA in Chester and Delaware Counties

During the afternoon session Daniel Coble, graduate assistant on the staff of the Department of Agriculture Education at the Pennsylvania State University showed slides and described the work of Young Farmer Groups throughout the state

T M Malin area advisor for Lancaster and York Counties reviewed the meeting stressing the need for a different name for the organization. He said the name "Young Farmers" is misleading because many of the members of the group are past the 30 year mark The name refers only to their young attitude toward learning he said

Speaking on the need for public relations in agriculture, Jack Owen Editor of Lancaster Farming asked "Who speaks for Agriculture?"

He said so many people claim to be speaking for the farmer that no one is doing an effective job

There are three ways in which a group can speak for the farmer," he said, "These are by advertising, publicity and public relations"

Advertising is good because you can control the message, but it is expensive Many farm organizations, such as Poultry and Egg National Board and American Dairy Association, are doing a good job of advertising, but the farmer must be willing to pay for having his message delivered to the consumer

Publicity is free but it is not always good The farmer has very little control of the message which reaches the consumer As examples he cited the cranberry scare of a few years ago the egg cholesterol furor and the Strontium 90 in

(Continued on Page 16)

Farm Numbers Continue Down

The number of farms in the United States declined more than one-third over the period 1950 to 1962, according to a recent report of the United States Department of Agricultural Stabilization and Conservation Service County Office

The number of farms decreased from 4 105 000 in 1959 to 3 818 000 in 1961, a reduction of 7 percent in the 2-year period the report shows This decrease in number of farms continues the downtrend which started slowly after 1935 and gained speed during the 1950's Between 1950 and 1959, farm numbers in the then 48 States dropped from 5 648 000 to 4 097 000—down more than one-fourth

"What happened to these farms" the report continues "They were consolidated into larger places mainly despite many losses to such nonfarm uses as suburban expansions

For the Farm Wife and Family

THE EGG AND YOU

By Mrs. Richard C. Spence

The old Lenten standby — the egg — is featured this season in some sparkling easy-to-assemble skillets and casseroles

Supporting the egg and making it a star in our Green and Gold Casserole are fluffy rice and chopped broccoli A rich and creamy sauce for the combination comes jiffy-quick from a can of condensed cream of celery soup spiced with nutmeg This is a casserole that takes but 10 minutes of baking It's ideal for the after-five cook who dashes home from the office to get dinner on the table for her family

GREEN AND GOLD CASSEROLE

1 can (10½ ounces) cream of celery soup undiluted
1-¼ cups water
½ teaspoon salt
Dash nutmeg
1-¼ cups packaged pre-cooked rice
2 cups chopped hard-cooked eggs (approximately 6)
1 cup chopped cooked broccoli

Heat oven to 375 degrees In a saucepan combine soup water salt and nutmeg heat to boiling Combine with rice and remaining ingredients Pour into 1-½ quart casserole Bake 10 minutes Makes 4-6 servings

Note Spinach or green beans may be substituted for the broccoli

Cheese Marvel can be whipped up in 20 minutes in either casserole or skillet

CHEESE MARVEL

1 can (10-¾ ounces) condensed cheese soup, undiluted
½ teaspoon salt
1-¾ cups water
6 quartered hard-cooked eggs
1 cup cooked mixed vegetables
½ teaspoon curry powder
1-¼ cups packaged pre-cooked rice

Heat oven to 375 degrees In a saucepan combine soup and next 3 ingredients Bring to a boil Stir in rice Pour into 1-½ quart casserole Bake 10 minutes Makes 4-6 servings

If you prefer top of the range-cooking combine all ingredients in large skillet Bring to a boil Reduce heat simmer 5 minutes Stir and serve Makes 4-6 servings

Note For a heartier dish, substitute 1 can tuna, drained and 4 hard-cooked eggs for the 6 eggs suggested in the above recipe

* * * *

If you have a flair for adventure in your cooking this Oriental dish will not be a lost cause If you or your family are partial to Oriental food you will like this authentic dish If Chinese dishes are new to your family now is the time to introduce them

EGG FOO

½ cup chopped onions
2 5-ounce cans bamboo shoots drained
1 5-ounce can water-chestnuts finely chopped
1 1-pound can bean sprouts, drained
1 teaspoon salt
½ teaspoon pepper
1 cup shredded wheat biscuit crumbs
12 eggs, well beaten
½ cup milk

Mix all ingredients For each serving heat 1 tablespoon shortening in a 6-inch skillet Add 1 cup of egg mixture cook over low heat, turning to brown both sides Makes 6 to 8 servings

* *

Here are some very quick recipes using hard-cooked eggs

DEVILED LUNCHEON EGGS

4 hard-cooked eggs, shelled
¼ teaspoon dry mustard
¼ teaspoon onion powder
¼ teaspoon salt
8-ounce tube smoky cheese
Few grains cayenne pepper
1 pound can peas, drained
2 tablespoons fine bread crumbs
Paprika

Cut eggs into halves lengthwise Scoop out yolks and combine with mustard, onion powder, salt 2 tablespoons smoky cheese-in-a-tube and cayenne Mix until smooth Fill egg whites with yolk mixture Arrange eggs in an 8-inch square casserole or 9-inch pie pan Pour peas around eggs Squeeze rest of smoky cheese from the tube over all Sprinkle bread crumbs over peas and paprika over eggs Bake in a slow oven (325 degrees) 15 to 20 minutes

* * * *

UNDER OVER EGGS

4 hard-cooked eggs, shelled
10-½-ounce can condensed tomato soup
½ cup milk
⅛ teaspoon basil if desired
4 slices buttered toast
½ cup grated sharp cheddar cheese

Combine soup and milk Add basil and heat Cut eggs into quarters and arrange 4 quarters on a piece of buttered toast Cover with hot tomato soup-sauce, sprinkle with cheese Serve with additional toast, fruit, and milk, if desired

* * * *

EGGS AND VEGETABLE CASSEROLE

4 hard-cooked eggs, shelled
2 ounce can mushrooms, drained
2 tablespoons chopped pimiento
½ teaspoon salt
1 cup cooked cut asparagus or green beans
10-½-ounce can condensed cream of celery soup
¼ cup milk
½ cup coarse buttered bread crumbs

Slice the eggs into a shallow buttered casserole Top with remaining ingredients in the order listed Place uncovered in a moderate oven (350 degrees for 30 minutes

● The Egg and You

(Continued from Page 14)

EGG SALAD STUFFED CELERY

3 hard-cooked eggs shelled
6 pitted ripe olives chopped
¼ teaspoon onion salt
½ teaspoon salt
2 teaspoons chili sauce
3 tablespoons mayonnaise
1 bunch of celery

Chop eggs and combine with olives, onion salt, salt, chili sauce and mayonnaise. Blend well. Separate celery stalks, wash and dry. Cut the celery into 3 inch lengths. Fill the end of each celery stick with a spoonful of the egg salad. Sprinkle with paprika if desired. Serve in place of salad for lunch or dinner.

* * * *

DEVILED EGG MOLD

1 envelope unflavored gelatin
½ cup water
1 teaspoon salt
2 tablespoons lemon juice
1½ teaspoon Worchestershire sauce
⅛ teaspoon cayenne pepper
¾ cup mayonnaise
1-½ teaspoons grated onion
½ cup finely diced celery
¼ cup finely diced green pepper
¼ cup chopped pimiento
4 hard-cooked eggs chopped

Sprinkle gelatine on water to soften. Place over low heat and stir until gelatine is dissolved. Remove from heat and add salt, lemon juice, Worcestershire sauce and cayenne pepper. Cool. Stir in mayonnaise. Fold in remaining ingredients. Turn into a 3-cup mold or individual molds and chill until firm. Unmold by dipping mold in warm water to depth of the gelatine. Loosen around edge with the tip of a paring knife. Place serving dish on top of mold and turn upside down. Shake holding dish tightly to mold. Garnish with salad greens and green pepper and serve with salad dressing.

EGG AND NOODLE TREAT

4 hard-cooked eggs
1 tablespoon chopped parsley
1 teaspoon minced onion
¼ cup mayonnaise
¼ cup margarine
¼ cup flour
2 cups milk
Salt and pepper
½ pound velveeta-type process spread, sliced
1 8-ounce package medium egg noodles, cooked and drained
Soft bread crumbs

Cut eggs in half lengthwise. Remove yolks, mash and combine with parsley, onion and salad dressing. Fill the whites.

Make cream sauce with margarine, flour, milk and seasonings. Add the cheese and stir until it is melted. Add half of this sauce to the noodles and place them in a casserole. Arrange the stuffed eggs on top, cover with the remaining sauce. Garnish with the crumbs. Bake in a moderate oven 350 degrees 20 minutes, or until crumbs are brown.

* * * *

DEVILED TUNA

1 tablespoon chopped onion
1 4-ounce can sliced mushrooms drained
¼ cup butter or margarine
¼ cup flour
½ teaspoon salt
½ teaspoon dry mustard
¼ teaspoon paprika
⅛ teaspoon black pepper
Dash cayenne pepper
1-½ cups milk
½ teaspoon Worchestershire sauce
1 teaspoon lemon juice
2 hard-cooked eggs sliced
1 7-ounce can tuna drained and flaked

Saute onion and mushrooms in butter or margarine. Stir in next six ingredients. Add milk, Worchestershire sauce and lemon juice. Cook stirring constantly until sauce thickens. Add sliced eggs and tuna. Heat and serve over crackers. Makes 4 to 6 servings.

● Young Farmers

(Continued from Page 13)

milk fear campaign of last year Here was publicity in action, but Poultry and Egg National Board and the American Dairy Association as well as many other farmer-supported organizations have spent thousands of dollars in a try to overcome the publicity.

Public relations in agriculture combines the best, and sometimes the worst of the other two If public relations work is to be effective, he said, it requires a lot of time, labor and sometimes expense It the farmer wants to get his story before the consuming public, he is going to have to be prepared to work for it, and perhaps to pay for it

Alfred Overly Quarryville R1 regional vice president of the Penna YFA was in charge of the meeting

● Farm Numbers

(Continued from Page 13)

commercial forestry and highway developments

The land in farms in 1961 — at 1,169 million acres — was only about 1 percent less than the 1959 total and only about 3 percent less than in 1950

The small decrease in land in farms reflects the importance of combinations into larger operating units, losses in the number of small farms generally, and the swift decline in sharecropper and tenant operations in some Southern areas"

By running tractors at minimum engine speed and in the highest gear, farmers can save as much as three quarters of a gallon of fuel an hour

FOR TWENTY-FIVE YEARS of service as a Motor Truck and Farm Equipment Serviceman was rewarded by the International Harvester Sales and Service, Ephrata. E W. Rutt, left, manager of the company, looks on as Calvin Stoltzfus, center, receives a 25 year pin and a gold wrist watch from Bing Wolf, shop foreman. During Mr. Stoltzfus' 25 Years with International Harvester Sales & Service as a Mechanic he has attended 10 Factory Training Schools. These courses included Diesel, Gas, and Propane Motors. He has also special Training on Electrical Equipment His hobby is antique Gas Engines At the present time he is restoring a 50 Year old 15 HP. Engine He is also a Director at the used Equipment Museum at Kinzer, Pa.

BEST FOOD BUYS
Spring Prices Have Not Arrived

Spring has arrived according to the calendar, but you'd never know it if you were judging by the prices of fresh produce at your local foodmarket Many vegetables are in short supply this week, with prices reaching highest levels of the year reports Tom Piper, Penn State Extension Marketing Agent Shortages are the result of succeeding waves of bad weather in all principal Winter producing States

Celery prices are the highest in several years Cabbage shipments have been very light and sharp price advances have occurred for both old and new Iceberg lettuce broccoli, cauliflower sweet corn and cucumbers are in light supply and higher in price

Good buys in fresh vegetables are limited to potatoes, green beans leafy greens, peppers, radishes, mushrooms and sweet potatoes

Grapefruit oranges and Staymen and Rome apple varieties remain in plentiful supply with reasonable prices The strawberry season is gradually getting underway, shipments are arriving from Florida Louisiana and California but a careful selection should be made because quality is unpredictable Banana prices are high due to shortage of supplies

Imported fruit is an important factor in supplying our needs at this season of the year Pears, grapes, peaches, plums and nectarines arriving from Argentina Chile and other South American countries provide you with these fresh fruits during our off-season Prices are reasonable on these items, considering the transportation and handling charges involved.

Frozen turkeys, still in large supply and priced as much as 18 per cent below a year ago will share the good value position with frying chicken and a variety of pork items this week-end Pork roasts bacons and fresh picnics beef chuck roasts and lamb will be featured at attractive prices in many stores. Eggs and dairy products are economical protein suppliers too

Tree-Ripened Fruit

To the experienced food shopper tree-ripened generally means some extra special quality that makes for a better, tastier fruit Catherine Love Penn State extension consumer economics specialist, explains that grapefruit is always marketed as tree-ripened. Unlike such other fruits as pears or bananas grapefruit won't ripen after harvest. That's why it must be kept on the trees until the peak of quality is reached

Plan your early vegetable garden now You can plant peas as early as you can work the ground Don't hurry planting warm season crops such as corn since they are likely to freeze out

A good market for replacement cattle — Good runs of Warmed Up Cattle — Ready to finish

Since 1935, your dependable

Better Chemicals and Dependable Equipment Pay For Themselves in HIGHER YIELDS and BETTER RETURNS!

For Potatoes, Peas and Beans

Early weed control with Premerge costs less than cultivation!

Applied to bean, field pea, corn and potato crops at planting time or before crop emerges, Premerge* controls weed and grass seedlings when a wet spring delays or makes cultivation impossible. You can eliminate several expensive early cultivations . . . give young crops a head start toward bigger yields. Premerge may actually cost less than tillage, and up to 70% less than other products . . . and since it kills weeds by contact, you can use it on or near many crops susceptible to 2,4-D.

Esteron 99 STOPS WEEDS ...saves moisture and fertility in corn, small grains and pastures

Troublesome weeds can rob your growing crops of needed moisture and soil fertility. Now, you can stop this loss in your corn, small grains and pastures with Esteron 99* . . . a versatile, easy-to-use 2,4-D that's more effective than old-fashioned materials . . . kills a wide range of tough broadleaf weeds easily and effectively. Discover for yourself why more farmers use Esteron 99 than any other brand of 2,4-D. See us today.

And For

A low-cost way to control quack grass in potatoes

It's DOWPON*—the economical quack grass killer. Apply just before potatoes come up . . . or in the fall after harvest. Tests prove potato profits can be increased as much as 50% when grass is controlled by Dowpon! That's because Dowpon, sprayed on the leaves, kills the whole grass plant—from the tops to the deepest roots—at a rock-bottom cost per acre.

Spray more efficiently with the

Kwh portable mist-sprayers and dusters

Mist blowing is the modern way of spraying . . and Kiekens Whirlwind Holland offers you the finest Power Knapsack machines ever built. Shown here is the new Model 25TT—a mist blower and duster combination which gives you every feature you ever wanted in a portable sprayer. The twin tanks can be used for dusting, mist-spraying or wet-dusting with no changes or special attachments. Several other models available.
